

M725 "Call-by-name"

M725

This digital terminal offers a whole range of functions, including call-by-name. Its practical and efficient design makes it extremely easy to use.

You can see at a glance who is calling, from the terminal's display. Hence the name "Call-by-name"!

M725 has functions such as programmable keys with notification through LEDs. With Call-by-name using the keypad you can quickly call someone from the directory. Thanks to an indicator light you can see at a glance when a message has been left in your mailbox. With the call log you can consult the calls you have received, and call back the number consulted.

M725 "Call-by-name"

Presentation
